

Machining

Converting formed materials to critical components requires precise machining. Our technicians are experts in meeting the challenge of difficult jobs. KT Plastics's highly technical, specialized machinery means the difference in meeting our customers' critical deadlines ... and meeting them with quality products that get the job done!

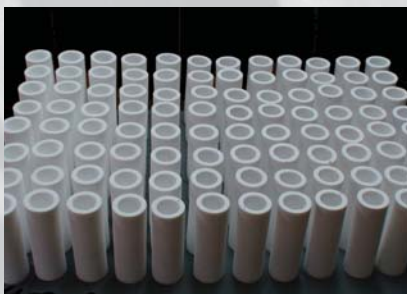

Materials

The finest in blending, filling and reinforcing materials enables us to produce components with the broadest possible range of high properties. Our quality assurance begins with rigid material specifications and continues throughout the entire manufacturing and testing process.

Selection

KT Plastics' material selection and manufacturing capabilities enable us to respond accurately and quickly with a broad range of quality products - all designed to meet specific temperature, pressure, tolerance and chemical exposure demands. KT Plastics is committed to providing optimum performance in tough situations.

Quality

KT Plastic's quality starts with the finest raw materials available, selected against rigid performance standards. KT Plastic products can be blended, non-blended, filled and/or reinforced. Our broad range of technical capabilities in molding, machining and fabrication can solve your special application problems - whether it involves custom plastic components, gaskets or seals.

Products

- Machined plastic parts
- Custom gaskets
- Stamping/Die cutting
- Spring energized seals
- Expanded PTFE sheets
- Compression-molded rod & tubing
- Raw materials
- Polyurethane
- Polypropylene
- PEEK™ and PEEK™ blends
- Teflon® and Teflon® blends
- Nylon
- Nylatron®
- MD/Nylon
- Acetal and Acetal blends
- PVC and CPVC
- PPS blends
- Phenolic
- Delrin®
- Ryton®
- Viton®
- Vespel®
- PFA®
- Tefzel®
- Lexan®
- Aflas®
- HNBR
- Neoprene
- Kel-F®
- Kynar®

Choice

Our single-source capability includes a broad range of seals - both hydraulic and pneumatic - for standard and high tech application.

Experience

KT Plastics President and Founder Kenny Townsend has more than 30 years of experience in specialized plastic products. Kenny, along with his son Brian, are proud to offer plastic products to companies nationwide. For more information or to learn about custom products, call KT Plastics at 580-434-5655 or visit www.ktplastics.com.

People
